JOSEPH W. VESTAL & SON
Little Rock, Arkansas. P.O. Box 856

LATE FLOWERING TULIPS - 35¢ per dozen. \$2.00 per hundred.

IMPORTANT TO BUYERS

By observing the following rules and directions, mistakes and misunderstandings will be avoided

WHEN TO ORDER

Send in your order for bulbs, plants, etc., as soon as you receive this catalog. Most bulbs offered in this list are spring bloomers and should be planted from September to December. We are prepared to fill orders at once, with few exceptions, and these will follow a little later.

HOW TO SEND MONEY

Remittances should Always Accompany Order. They may be made at our risk by any of the following methods: (1) Postoffice Order, (2) Bank Draft, (3) Express Company's Money Order, (4) Cash by Express in amounts of not less than \$5.00, (5) Cash in Registered Letters. When money cannot be sent in either of the first four ways, it may be sent in a Registered Letter from any postoffice. The rates charged for Postoffice Orders and Express Money Orders are now so low that this is the best way to remit where they can be obtained. We bear the expense of sending money in either of the above ways when order amounts to \$1.00 or over. Small amounts can be quite safely sent in stamps. Coin should not be sent by mail.

POSTAGE AND EXPRESS CHARGES

Bulbs will be sent by mail or express charges prepaid, when ordered at single or dozen rates; at the 100 rates and over, they are sent by express at purchaser's expense, unless otherwise stated. Not less than three of any one variety supplied at the dozen rate, 25 at 100 rate, 250 at 1,000 rate. Seeds will be sent free by mail or express unless otherwise stated.

ALWAYS USE THE ORDER SHEET

and envelope sent with the catalog when it is possible to do so. Write plainly, keep a copy of all your orders, and be sure to sign your name, postoffice, county and State every time you write. We quite often receive orders where these have been omitted, and nothing can be done until complaint is received. Extra envelopes and order sheets will be sent on application.

PLANTS

Ornamental Shrubs, Trees and Herbaceous Plants can be sent by express or freight only, customers to pay the transportation charges. We have found that small plants, such as are sent by mail, do not give uniformly satisfactory results. Moreover, to keep the postage within limits, we are obliged to take most of the soil off the roots, and this is not good for the plants. Besides that, our plants have grown into such sturdy specimens that it is almost impossible to mail them. We know that you will be better satisfied with the stock you get by freight or express, and in comparing our prices with those of others, keep in mind size and quality of plants you would get.

SUBSTITUTION

It sometimes occurs that our assortment of some varieties of bulbs and plants become exhausted before the close of the season, in which case we shall take the liberty of substituting others of the same color and price, being equally as good as, if not superior to, those ordered. Should any of our customers object to this course, however, they will please state so in their order.

Grape Hyacinths

Very pretty, producing flowering spikes about six inches high, with little round bells so arranged as to resemble a bunch of grapes. Admirable for permanent beds and edgings and partially shaded situations, where they should be planted in groups of one dozen or more, where they will soon spread and being perfectly hardy will take care of themselves. They are very pretty when grown six in a pot in the house for winter flowering.

BLUE GRAPE. Price, 15 cents per dozen.

WHITE GRAPE. Price, 20 cents per dozen.

White Italian Hyacinths

The profusion of bloom, fragrance and graceful spikes render them very popular for cutting purposes. The bulbs are red skinned and bloom a little later than White Romans, and therefore are valuable for succession; also for garden planting for spring flowers. Price, 5 cents each; 50 cents per dozen.

Cockade Hyacinths

A real curiosity. First, a frizzed, cockade like spike, an inch or two in length, appears above the soil, and as it slowly rises on its long stalk it becomes five or six times as long as at first, developing into a long feathery blue plume, and lasting for weeks in that condition. Perfectly hardy in the garden, and fine for pots. Price, two for 5 cents; five for 12 cents; twelve for 25 cents; 100 for \$1.00.

Dutch Roman or Miniature Dutch Hyacinths

These so called Dutch Romans are really very small single Dutch Hyacinths, which bloom similar to the true French Roman offered above, except they are later. They make pretty little sprays of flowers.

BLUE. Price, 5 cents each; 50 cents per dozen.

PINK. Price, 5 cents each; 50 cents per dozen.

WHITE. Price, 5 cents each; 50 cents per dozen.

Vestal's Superb Named Hyacinths

Double Flowering Hyacinths.

Early Roman or Christmas Hyacinths

These are the earliest of all the Hyacinths for house culture, and can be had easily in bloom for Christmas or New Years. Very graceful, and a more delicate and subdued perfume than the Dutch Hyacinths. A single bulb often throws up several spikes of bloom.

Not at all like the Dutch or Show Hyacinth, though they do not suffer by comparison. The slender stems, arching beneath their load of dainty poised bells, are the acme of grace and elegance, while so many spikes are thrown up from each bulb that the whole plant appears a mass of bloom. Roman Hyacinths are extra good for cutting, and so early that they bloom by Christmas or before, remaining in perfection nearly a month if the room is not kept too warm. They are extremely early and bloom in the garden with the Crocus. Two bulbs can be planted in a four inch pot, or three bulbs in a five inch pot. The bulbs we offer are extra large, and superb for winter blooming. Price, 5 cents each; 50 cents per doz.

Single Tulip Planting.

Single Tulips

There is no question but that the Tulip is the most popular spring flower that grows. The soft, seductive breezes have scarce whispered in our ears that spring is at hand, ere our eyes, wearied of winter's dull, somber, lifeless tints, are dazzled by a sudden blaze of Tulips in rainbow shades, ribboning the earth with warmth and color. From the first Duc Van Thol, scarce peeping above the ground, to the last Gesneriana Tulip, holding its flaming cup high aloft, there is a constant succession of Tulip beauties, single, double, dwarf, half-dwarfed and tall, early, medium and late, with blossoms cup shaped, star formed, bowl like, paeony flowered, imbricated like a rose, or twisted, waved and horned like the plumage of some fantastic bird. No garden can be complete without Tulips and plenty of them. Fortunately they are inexpensive.

Price, 5 cents each; four for 15 cents; the fourteen for 50 cents. Any variety by the dozen, 35 cents.

L'IMMACULEE. Beautiful snow white flower, with lemon eye.

COTTAGE MAID. Beautiful bright pink, feathered and flamed with pure white. Early and one of the most lovely.

LA REINE. Large, elegant flower, splendidly cuped. Pure white exquisitely shaded and clouded with soft pink.

PURPLE CROWN. Fine cup shaped flower of maroon cardinal. The rich dark color is beautifully brought out by the satin like sheen of the petals.

SILVER STANDARD. Beautifully shaped flowers of a fresh carmine scarlet, striped and feathered white. Very showy.

ARTUS. Flower of gigantic size and richest glowing scarlet red. Extra early and fine in every way.

Late or May Flowering Hardy Garden Tulips

These grand late flowering garden Tulips are on the rising tide of popularity. They do not supplant early Tulips for forcing, nor bedding, but for mixed gardens, herbaceous borders, sunny positions in proximity to shrubbery, etc.—where these late Tulips need not be disturbed, they will prove a source of great satisfaction, being very hardy, continuing to grow, increase and flower for many years—Conditions being at all congenial—many of the varieties having been collected from the cottage gardens of England, Scotland, Ireland, Flanders, etc., where they have been growing in some cases for fifty years. During April they present a gorgeous appearance, the flowers being very large, of durable substance, beautifully formed and borne on tall stiff stems, rendering them of exceptional value when cut for vases. **Price, 5 cents each; 35 cents per dozen; \$2.50 per 100.**

BRIDESMAID. Brilliant cherry rose flushed striped with scarlet, violet and white; very distinct.

BOUTON D'OR. (Ida, Golden Beauty.) Rich, deep golden yellow; a large, long stemmed, globular flower of finest substance; fine bedder and unequaled for cutting.

These Tulips are grand for cut flowers. **Price, 4 cents each; 35 cents per dozen; \$2.00 per 100.**

Parrot or Dragon Tulips

Parrot Tulips are very picturesque and attractive. Their blooms are of large size and most vividly brilliant, and in addition to red and yellow, combine many shades of green. As cut flowers they last a long time, and certainly deserve to be planted in quantity by lovers of bulb flowers. The petals are curiously fringed or cut. Giant White Narcissus

New, Distinct and Beautiful. Magnificent Large Flowers. Grows in Water.

This grand variety is the earliest flowering Narcissus, coming into bloom for the Christmas holidays. Grows with absolute certainty and produces in lovely clusters immense numbers of deliciously scented pure white flowers, whose fragrance is the equal of Orange Blossoms. Superb in every way.

GROW IT IN WATER. It succeeds best when grown in water. Place sand or gravel in the bottom of the receptacle in which it is to be grown, firmly embedding the bulb in it; then keep well covered with water as shown in the illustration and you will not have long to wait until the lovely clusters of large white flowers will appear. It may be grown in soil, like a Hyacinth, but the best and most interesting method is in pebbles and water.

TO GET THE BEST EFFECTS several bulbs (not less than six) should be planted together. Give plenty of sunshine, and we think all our friends who are fortunate enough to try it will concede that for fragrance, immensity of flowers and ease of culture it will be hard to find the equal to the Giant White Narcissus. The bulbs we offer are imported direct from France; are large, sound and solid; sure to grow and bloom. **Price, postpaid by mail, two for 10 cents; six for 25 cents; 50 cents per dozen.**

Chinese Sacred Narcissus or Oriental Narcissus

The "Shui Sin Far," or Water Fairy Flower, Joss Flower, or Flower of the Gods, etc., as it is called by the Celestials, is a variety of Narcissus, bearing in lavish profusion chaste flowers of silvery white, with golden yellow cups. They are of exquisite beauty and entrancing perfume. It is grown by the Chinese according to their ancient custom, to herald the advent of their new year, and as a symbol of good luck. The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, insuring luxuriant growth and immense spikes of flowers. In fact, the incredibly short time required to bring the bulbs into bloom (four to six weeks after planting) is one of the wonders of nature. "You can almost see them grow," succeeding almost everywhere and with everybody. They do well in pots of earth, but are more novel and beautiful grown in shallow bowls of water, with enough fancy pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the winter. We are importing direct from China immense bulbs of the true large flowering variety. **Price, 15 cents each; four for 50 cents.**

Sweet Scented Jonquils

Much prized for their charming large golden and deliciously sweet scented flowers; perfectly hardy and flowering very early in the spring; also admirably adapted for winter flowering in the house. Three to six bulbs in a four or five inch pot.

SINGLE JONQUIL. The well known favorite. Rich yellow, fragrant. **Price, 3 cents each; 20 cents per dozen.**

DOUBLE JONQUIL. Heads of small but very double deep golden yellow flowers, powerfully scented. **Price, 3 cents each; 25 cents per dozen.**

CAMPERNELLE. Large yellow flowers, 4 to 6 on a stem. **Price, 3 cents each; 20 cents per dozen.**

GIANT JONQUILS RUGULOSUS. An improved, large flowering Campernelle with broad perianth and large wrinkled cup; full yellow. **Price, 3 cents each; 25 cents per dozen.**

DOUBLE CAMPERNELLE JONQUIL. A rare and beautiful variety bearing very large double yellow and orange fragrant flowers. **Price, 3 cents each; 25 cents per dozen.**

Giant White Narcissus.

Snowdrops

These are the first flowers to greet us in the spring, their pretty drooping snow white blossoms appearing in March, a few days ahead of Scilla Siberica, with which they form a charming contrast. They are also fine for house culture in pots, blooming usually at Christmas. The Giant Snowdrops we offer are much superior to the common variety, producing larger flowers.

GIANT SINGLE SNOWDROP. **Price, 3 cents each; 25 cents per dozen.**

GIANT DOUBLE SNOWDROP. **Price, 4 cents each; 30 cents per dozen.**

SNOWDROP ELWEISII. A very large, tall variety. Fine for cutting. Flowers three times the size of ordinary Single Snowdrops and sweet scented. **Price, 4 cents each; three for 10 cents; 35 cents per dozen.**

PLEASE NOTICE. At the single and dozen rates we send all bulbs by mail, postpaid. At the hundred rates the bulbs are sent by Express or Freight, Customers paying the charges. We supply six at the dozen rate, twenty-five at the hundred rate.

Narcissus or Daffodils

No flower of the whole bulb family is more popular than the beautiful and fragrant Narcissus. They are perfectly hardy, except the Polyanthus varieties; and even these, with a good thick covering of leaves or coarse litter to exclude the frost, will give most elegant flowers when grown in the garden. Once planted, Narcissus need no further attention, steadily increasing in strength and beauty as the years pass, the clumps multiplying very rapidly, until flowers without number can be gathered. They are simply grand. Narcissus do well in every kind of soil, in sun or shade, in moist or dry places, under trees or amongst grass anywhere. For house culture nothing is finer, needing practically the same treatment as the Hyacinths. In endless variety of shapes and shades, they may be had in bloom the entire bulb season.

At the single and dozen rates, we send all Narcissus bulbs by mail, postpaid. At the 100 rates, the bulbs are sent by express or freight, customer paying charges.

Polyanthus Narcissus or Bunch Flowered Daffodils

Deliciously Fragrant, of the Easiest Culture and Suitable for Flowering in the House in Pots or in Water

The polyanthus varieties of Narcissus are not only beautiful, but deliciously sweet scented and of the easiest culture. Very free flowering and suitable for window garden, conservatory or garden, continuing long in bloom. They bear tall spikes of bloom, bearing from six to twenty-four flowers each. The pure white petals and gold cup of some varieties, the yellow with the orange cup of others, and the self whites and the yellows render them great favorites.

The "Large Flowering" is more vigorous and earlier, producing purest snow white flowers of large size and good substance in large trusses. It is perhaps more largely used for early forcing for cut flowers than any other kind of bulb, being brought in without difficulty by Christmas, and if required, even much earlier. Spanish Iris

(Iris Hispanica.)

These have appropriately been called "the Orchids of the Hardy Flower Garden," some of the choicer orchids being their only rivals, and even they can hardly be said to exceed them in richness, variety and beauty.

The exclamation of delight at first sight given forth by those who have not previously seen them are undisputable proof of their well-deserved merit.

When cut they last in good condition for a week or more. They are of the simplest culture, succeeding in almost any soil or position. The bulbs should be planted 2 to 3 inches deep and 6 inches apart, early enough in the autumn to allow them to make some growth before hard frost comes. For best effect they should be planted in beds or groups of 25 to 100 or more bulbs—the larger the number the finer the effect. They grow from 18 to 24 inches high, and bloom from the end of May on through June, and the bulbs may either be lifted or allowed to remain, giving good results for a number of years.

Mixed Spanish Iris, 25 cents per dozen; \$1.25 per 100.

Japan Iris

The magnificence of these new Iris surpasses description. The flowers are of enormous size, averaging eight to ten inches across, and of indescribable and charming hues and colors, varying like watered silk in the sunlight, the prevailing colors being white, crimson, rose, lilac, lavender, violet and blue; each flower usually representing several shades, while a golden yellow blotch, surrounded by a halo of blue or violet, at the base of the petals, intensifies the wealth of coloring. The Japan Iris is perfectly hardy and flowers in great profusion in July and August. Price 15 cents each; four for 50 cents.

German Iris

Blooms earlier than Japan Iris. This variety is the true "Fleur de Lis," the national flower of France. They are perfectly hardy, thrive anywhere, deliciously fragrant and fine for cutting. In beauty the flowers rival the finest Orchids, the colors ranging through richest yellow, intense purples, delicate blues, soft mauves, white and bronze of every imaginable shade. We offer five distinct colors. Price, 15 cents each; two for 25 cents.

Zephyranthes

Among our most beautiful dwarf bulbous plants, very effective for planting out in masses in May, flowering with great profusion during the summer. They are also most suitable for pot culture; 6 to 12 bulbs clustered in a 6-inch pot in the autumn will give a fine display of bloom during the winter in the window garden or conservatory.

ATAMASCO. White suffused with flesh pink; hardy. 3 for 10 cents; 30 cents per dozen.

CANDIDA. Large white flowers. 3 for 10 cents; 30 cents per dozen.

ROSEA. Beautiful, large rose colored flowers. 5 cents each; 50 cents per dozen.

SULPHUREA. Bright yellow. 5 cents each; 50 cents per dozen.

Tritoma Pfitzerii

The best variety. The flower spikes, which are produced with considerable more freedom than in the old variety, are of gigantic size, frequently four and one-half feet high, with heads of blooms over twelve inches long of a rich orange scarlet, shading to salmon rose on edge. Price, 25 cents each; five for \$1.00.

Day Lilies

(Funkias.)

LARGE WHITE. Blooms continuously from August until frost, producing scores and even hundreds of its large lilies. Handsome light green foliage. Price, 20 cents each.

VARIEGATED LEAVED. Leaves as handsome as a flower. A rosette cluster of almost white leaves, lightly striped with green and yellow. Flowers pretty pink lilac blue on tall spikes. Price, 20 cents each; three for 50 cents.

Spanish Iris.

Double Large Flowering Paeonies

Once planted they will last a life time with little care. They grow from one to three feet high, producing magnificent blooms, which sometimes almost surpass the beauty of the rose. Another point which is largely in their favor, is the fact that the plants are never attacked by either insects, animal or fungal disease. Paeonies will succeed in most any kind of soil, but give best results when planted in a deep rich and somewhat moist loam.

FIRST PRIZE WHITE. Has immense pure white blossoms with carmine flaked tips to a few center petals. It is the first to flower, and is succeeded just before its flowers begin to fade by the First Prize Pink.

FIRST PRIZE PINK. Blossoms immense, on long stiff stems, and in color almost identical to a La France Rose.

FIRST PRIZE RED. This beautiful variety resembles the American Beauty Rose in color, succeeds the First Prize Pink, extending the flowering period for Paeony blossoms almost two months.

Price, double white, 35 cents each; double pink and red, 30 cents each. One each of the three varieties, 85 cents.

Bleeding Heart

One of the finest plants known for borders, beds, pots or for planting in any sunny situation. If potted in November and left outside until it has formed new roots, and then brought into gentle heat, it will flower early in March. Beautiful Rose colored flowers. When planted in the open ground it flowers in April and May. Absolutely hardy. Price, 20 cents each; three for 50 cents.

Suggestions for Ornamental Planting of Bulbs for Beds

For the convenience of our customers, and to encourage the planting of these beautiful flowers in beds, we recommend the following combinations. These are the same bulbs as offered under separate colors on page 2 and 3 and have been especially selected to bloom at the same time and to grow to the same height.

They should be planted in the fall, six inches apart each way and three to four inches deep. Give them slight protection over winter and they will flash forth in beautiful bright colors early in the spring and remain in bloom some weeks. Then the bulbs may be removed in time to set your summer flowering plants. Or in some soils, bulbs do well a number of years without lifting or replanting. So that in the same bed one may sow or set out shallow rooting plants, such as Petunias, Verbenas and Portulacas which will keep the bed bright all summer through and in no way hurt the bulbs.

Freesia.

Lilies (Lilium)

Lilies deserve first place among hardy bulbous plants. Their stately habit, beautiful form and coloring and in some cases exquisite fragrance is equaled by very few other classes of plants. While they are nearly all hardy, we recommend a slight covering with ashes or litter during the winter.

Lilies will thrive in most any soil, though a light, well drained soil suits most of them best. *L. Candidum* and *L. Tigrinum* prefer a rich, loamy soil, while *L. Auratum* thrives to perfection in ordinary light soil. An ideal place to plant Lilies is the hardy border. Here they find the correct conditions essential to best development, and the shade of surrounding shrubbery affords beneficial protection. For pot culture, use a mixture of loam, peat and sand. Plant bulbs in small pots, shifting them into larger ones as plants get bigger.

ABOUT DELIVERY OF LILY BULBS. *L. Candidum* and *L. Harrisii* arrive in this country in August, when they are ready for shipment. The Japanese varieties are not ready until November. The beds for them should be prepared during the fall and covered with litter to prevent freezing. All other sorts are ready for mailing during September. Plant all Lily bulbs as soon as you get them.

AT THE SINGLE AND DOZEN RATES, WE SEND ALL LILIES BY MAIL POSTPAID.

Lilium Harrisii BERMUDA EASTER LILY

This grand Lily is without question the best for greenhouse forcing or winter blooming in pots in the house. The flowers are trumpet-shaped, pure waxy-white and exquisitely fragrant. The bulbs should be potted in the early fall, using very rich soil, and kept in a cool dark place to get a strong root growth before the tops start. Height, about 3 feet. Our first size bulbs will bear from 6 to 12 flowers; smaller sizes 4 to 6. **Not hardy in our climate.** — **Price,** mammoth bulbs, 35 cents each; \$3.50 per dozen; medium size bulbs, 20 cents each; \$2.00 per dozen; small size bulbs, 15 cents each; \$1.50 per dozen.

Get ready for the winter window garden now, before cold weather sets in. You are sure to receive exceptional value from our stocks for every dollar sent us, as our plants are in splendid condition. We send free to our customers, on application, a very instructive leaflet on the Care of House Plants.

ASPARAGUS SPRENGERI

This is considered one of the handsomest plants for house and conservatory ever introduced. It is especially desirable for pots, vases and baskets, covering all with its beautiful drooping sprays of lovely green foliage, which can be cut freely, and is very useful for all kinds of floral decorations. Easily grown, requires but little care, and keeps on growing fresh and green the whole year. Flowers white, delicately scented. Price, fine plants, 15 cents each; larger plants, 25 and 50 cents each.

ASPARAGUS PLUMOSUS NANUS

(Climbing Lace Fern)

One of the handsomest foliage plants. The fronds are a bright green, gracefully arched, and as fine as silk, often making vines ten to twelve feet long. A beautiful plant for climbing up the edge of lace curtains. Their lasting quality when cut is remarkable, retaining their freshness for weeks. Price, fine plants, 15 cents each; larger plants, 25 and 50 cents each.

ASPARAGUS TENUISSIMUS

A beautiful species of climbing habit, remarkable for the delicate appearance of its foliage. As a decorative plant it is very striking, and for contrast with foliage of other plants it is one of the most effective. The sprays are beautifully used with cut flowers in the arrangement of bouquets or vases, and last a long time after being cut. Price, 15 cents each; larger size, 30 cents each.

COMPACT SWORD FERN

(Nephrolepis Cordata Compacta)

Fitting companion for the Boston; dwarfer more erect in growth, much darker shade of green, very gracefully arched. Very desirable as a house plant. Price, 15 cts. each; larger, 30 cts. each.

THE BOSTON FERN

For hanging baskets or single specimens in pots or baskets it is superb. We know of no other plant that withstands ill-treatment better, or thrives so splendidly under good care. It does equally well in sun or shade outdoors during summer, and presents an imposing appearance indoors during winter. It forms an immense number of graceful drooping fronds varying in length from two to five feet, which arch over like plumes in every direction, and which are always of a fresh, healthy and beautiful green color. Price, strong plants, 15 cents each; larger, 30 cents each; extra large, 50 cents each.

NEPHROLEPIS SCHOLZELI

(The Plumed Scott Fern.)

The ideal plumed fern, holding the same position to all other plumed varieties that Scotti holds to the old Boston. It is a sport from Scotti, possessing all the merits of that most popular variety, but with the pinna sub-divided giving it an airy feathery appearance. The fronds, like in Scotti, stand erect, with a graceful arch forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance as is so often the case with other plumed ferns; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimen from becoming defective or yellow, which is one of the weak points of all its predecessors. Price, nice plants, 15 cents each; larger, 25 and 50 cents each.

Whitmanii Fern.

NEPHROLEPIS WHITMANI

(The Improved Tarrytown Fern)

This is an aristocrat among all the Nephrolepis, and when well grown is unquestionably the finest of the lot. In this we have unquestionably the most valuable fern of the Ostrich Plume type yet introduced. Not only is it if dwarfer and more compact habit than the Elegantissima but the leaves being more deeply divided, gives the plant a much more graceful appearance, while another important point in its favor is the fact that not a single frond has ever reverted to the common Boston Fern. We offer strong young plants, 15 cents each; four for 50 cents. Strong handsome four inch pot plants, 35 cents each.

NEPHROLEPIS SCOTTII

It is in essence a condensed form of the Boston Fern with valuable characteristics added, which are not evident in the parent, an average plant in an eight inch pot having 200 fronds. It has a crispness and hardness about it which is superior to the parent, and because of the fact that its character is established in the smallest size, it should find ready sale at all grades. Price, nice young plants, 15 cents each; larger size, 25 and 50 cents each.

MOSS FERN

(Selaginella or Lycopodium)

Much used in fern dishes or grown up in four or five inch pots. Its foliage is always fresh, green, very delicate and beautiful, lacelike. A bright green creeper that in a short time completely covers the pot, and will spread on to anything within reach. Price, 10 cents each.

Beautiful Crimson Winter Flowering Begonia Winter Cheer (*Gracilis Luminosa*)

20 cents each; three for 50 cents.

This beautiful new Begonia is the latest novelty in the Begonia family. As the name implies, it is one of the most symmetrical and yet graceful plants we have ever grown; very strong and robust, but still keeping its shape so as to make a most attractive plant. It has proved the most free-flowering of all Begonias, always in bloom—spring, winter and summer. The flowers, when first opening, are a bright cherry, changing to a clear coral-red. Its foliage resembles a little that grand old variety Vernon; rich glossy green, often shaded deep bronze. This novelty is one of the best of bedders, thrives everywhere and is destined to become the leader of all Begonias.

BEEFSTEAK BEGONIA

Sometimes called the "Strawberry leaf" Geranium; very ornamental; leaves silver top, red underneath; very pretty flowers. Each, 15 cents; 2 for 25 cents.

It is a strong, vigorous plant, and makes a fine appearance. Price, four inch pots, 35 cents each; larger sizes, 50 cents, \$1.00 and \$2.00 each.

Phoenix Roebelini

A new Palm is always interesting, but when the newcomer is easily the most graceful and withal the hardiest, it is a little short of sensational. The horticultural world has enthused over this beautiful Palm. It has the grace and lightness of *Cocos Weddelliana*, but is more robust in growth, and has tenfold the foliage of that fine variety. It is essentially different from it, foliage from the ground up gracefully recurved and spreading in habit. It will be most popular for house decoration. Price, 50 cents each; large plants, \$1.00 each.

VESTAL'S ROSES for Fall Planting

The advantages of planting Roses in the fall are many. Then the ground is rich with fertility, and the plants will at once take root and become firmly established. The following spring they will have an earlier start and will produce an abundance of choice flowers throughout the season, while the growth of spring planted stock will be checked and it will require some time to become rooted. Let us urge you to plant Roses this fall. They will reward you next summer by blooming freely.

We are glad, therefore, to make this special offer of extra large plants, all properly pruned and ready for delivery as soon as the wood is thoroughly ripened, which is usually early in November. These varieties have been selected with the utmost care, and we firmly believe they are the finest and best rose bushes that can be had anywhere. They may be planted any time before the ground freezes hard; give the soil about the roots a light protection over winter.

Segond Weber is in praise of her. Rosy-salmon or flesh pink in color, of the general type and color of "My Maryland." It is remarkably free blooming, producing clusters of three to six flowers, large as the best Tea Roses, very double and of a graceful form; petals tinted white on yellow ground, golden in the center.

Miss Mildred Vestal

In introducing this variety, we wish to say that it is one of the best Hardy Everblooming Red Roses in existence. This superb new rose is a result of a cross fertilization between "Rhea Reid," that grand red bedding rose, and "Richmond," the greatest of all red forcing roses, which insures in their offspring every point of excellence. It has magnificent large foliage, free from disease of all kinds, and is a tremendous grower—one of the best in all our list. The glory of the plant, however, is in the immense deep double flowers of a new and clear shade of crimson scarlet. It has withstood a zero temperature.

MOLLIE SHARMAN-CRAWFORD

We predict a great future for this grand snow white Rose; it is one of the freest branching and fastest growing in the whole Rose family; has medium sized foliage, dark and heavy, with good, stiff, wiry stems and blooms of the grandest size, fulness and build. The color is very pure, texture strong, it blooms freely and continuously; in all probability it will take first place as a white bedding and nurseryman's Rose.

The color is irresistible, the plant grows like a weed, and the flowers are nearly "immortelle" in their lasting quality.

A splendid new Climbing Rose, remarkable in many ways, but particularly in the brilliant fiery-red, or intense crimson-scarlet of the flowers. The intensely brilliant color is accentuated by the great masses of giant trusses produced on the plants, and furthermore by the contrast with the deep green, glossy foliage. The flowers are very double; they are larger than any of the Rambler Roses and borne in trusses of thirty to forty on each; the body of the flower is brilliant in color, but toward the edges of the petals they light up with a wonderful scarlet-crimson.

Hydrangea Grandiflora Alba

Hydrangea

Hydrangea Arborescens Grandiflora Alba. A variety of the native *H. arborescens*, recently discovered. The heads of flowers are in shape like *H. hortensis*; they are snowy white. It is a true shrub, begins to bloom in early summer and continues into the fall, so that it is practically everblooming. After *H. paniculata grandiflora* has lost its color this variety is still fresh, eventually turning to a light green and then brown. It is a graceful shrub and is destined to achieve the widest popularity. It attains a height of six feet and the same width, and is literally loaded with its grand panicles of large snowy white flowers, one of the grandest sights imaginable.

Hydrangea Paniculata Grandiflora. Most desirable, effective and popular ornamental shrub extant, and its many distinct and striking qualities at once commend it to general favor for yard or lawn decoration. The bush comes into bloom in July and August, yielding profuse, massive, cone-shaped flowers of the purest white, which, as the season advances, change to delicate pink, and later on to rich coppery red. Seen in the yard or on the lawn while in full bloom, it is truly an imposing spectacle, the prodigal display of white affording such a charming contrast with the green of its surroundings. The period of bloom being late, and prolonged for two or three months, at a season when other flowers are scarce and inferior, serves to impart a degree of summer freshness to the landscape.

Althaea

(Rose of Sharon.)

Alba Plena. Large double white flowers, blotched with rose.

VESTAL'S "PRIZE" MIXTURE. This mixture contains the very cream of the newest and standard sorts, including all the best new Sweet Peas in existence. It is made up entirely of separate named sorts, carefully proportioned as to its composition, and we can safely say, "**There is no better mixture in existence,**" no matter at what price or under what name it may be offered. It takes the place of liquid manure, and is just the thing that has been wanted for a long time. We have sold tens of thousands of packages of it, and have yet to hear the first complaint. If your plants are doing poorly, get a package and see how quickly they will be benefited. It acts like a charm. The Ammoniated Food is put up in wooden boxes with attractive wrappers. "Tyrian" Plant Sprinkler

FOR INDOOR AND OUTDOOR USE.

The "Tyrian" plant sprinkler is without question one of the most useful and most handy articles about the house, not only for the sprinkling of plants and flowers, but also used for sprinkling the floor and even clothes when ironing. This sprinkler should therefore be in every home. When using same for plants and flowers, especially when applying insecticides for the destruction of insects, we would advise to unscrew the head in filling same, but when water is used by the pressing of said sprinkler and placing in a vessel of water, it refills itself. We therefore advise everybody to get one which will last years. Large size, \$1.10, postpaid.
